Green Technological Change After Natural Disasters: Evidence from Hurricane Katrina

Media Coverage: CEPR VoxEU Talk – The next generation: PSE 2024 (<https://cepr.org/multimedia/next-generation-pse-2024>)

Abstract: Climate change leads to more destructive natural disasters, particularly hurricanes, which can significantly disrupt knowledge production. This paper studies the effects of Hurricane Katrina — one of the costliest and deadliest storms in U.S. history — on inventors' innovation outcomes, including green innovation which helps combat climate change. Using hazard and patent data for U.S. inventors in a difference-in-differences design, I find that Katrina reduced inventors' production of green patents, while non-green patents were unaffected. Specifically, affected inventors could have produced an additional 0.220 green patents following the storm, i.e., a potential 415 percent increase,

had Katrina not occurred. The negative effects are driven by the greater distance in technological expertise (knowledge diversity) among collaborators in green innovation teams, making it harder to substitute for affected inventors and continue their technological tasks. These findings suggest that climate change can disrupt human efforts aimed at addressing its impact, particularly through natural disasters and that knowledge diversity can compromise the resilience of technological development when faced with disruptions.

SEMINARS, WORKSHOPS AND CONFERENCES

2025	LBS Transatlantic Doctoral Conference (Scheduled), Barcelona School of Economics Summer Forum (Scheduled), LSE Environment Camp, Northwestern Kellogg (CSSI), Rotterdam School of Management;
2024	LSE PRINZ/POID seminar, PSE-CEPR Policy Forum 2024, Columbia University Ph.D. Workshop in Sustainable Development, Tenth ZEW/MaCCI Conference on the Economics of Innovation and Patenting, Naples School of Economics: 3rd PhD and Post-Doctoral Workshop, AOM The Organisation of Science PDW, AOM Technology and Innovation Management (TIM) Division Doctoral Student Consortium, AOM Strategic Management (STR) Division Dissertation Consortium: The Job Market and Beyond, DRUID24, 13th Oxford Residence Week for Entrepreneurship Scholars;
2023	12th Oxford Residence Week for Entrepreneurship Scholars, Imperial College Business School Economics & Public Policy Department Internal Seminar, Essex Paper Development Workshop for Early Career Scholars on Innovation, Technology and R&D Management;
2022	NBER Entrepreneurship Research Boot Camp, NBER Summer Institute Entrepreneurship, 11th Oxford Residence Week for Entrepreneurship Scholars;

2021	PhD Research Day in Strategy, Entrepreneurship and Innovation organised jointly by The Business School, City, London Business School and Imperial College Business School;
2020	American Economic Association (AEA) Annual Meeting

RESEARCH ASSISTANT

2017 – 2022	London School of Economics Prof. Saul Estrin
-------------	--

TEACHING ASSISTANT

2022 – 2023	Imperial College Business School Dr. Sam Asher Analytics for Applied Economics and Business (MSc Level)
2021 – 2022	Imperial College Business School Prof. Ralf Martin Analytics for Applied Economics and Business (MSc Level)

PROFESSIONAL SERVICE

2023 – to date	Oxford Residence Week for Entrepreneurship Scholars Assistant to organisers Prof. Saul Estrin, Prof. Maryann Feldman and Prof. Janet Bercovitz
----------------	---

HONOURS AND SCHOLARSHIPS

2018 – to date	Imperial College Business School Graduate Teaching Assistant Scholarship
2014	Peking University Hana Financial Group Scholarship
